as a consumer. on a fixed income if you approve the rate increases for Dominion Energy and Utah power you will be putting an undue burden on lower and middle class customers. my heating bill is up 12% in two months and the rate increase will probably add another 50%. this will force most people on fixed income to either lower their heat to an unacceptable level to stay warm or to go without good healthy food. There will be a huge demand for candles so we wont be able to turn the lights on!!

You will allow the utility companies to make absurd profits at the expense of poor and middle income people. please do the right thing and hold down the rate increases.

Our country has plenty of natural gas but the problem is that biden and his merry band of idiots has put on hold enough production to keep us with low prices. they could care less for those of us who wil suffer while they stay nice and cozy!!!

Thank you for  
your consideration.
