I have kept the account open to monitor the meter reader and allow the investigation to take place, even though we turned everything down and as it continued to climb, we then turned off all the appliances that use gas, (water heater and AC unit). As of today, all gas usage continues to be off.

NOTE: Dominion Tech, stated that sometimes the meter reader's needles stick.

I requested an evaluation from Dominion, I believe that they should not continue to add fees and be demanding payment, threatening to add interest fees on top of all.
