PUBLIC NOTICE

Notice is hereby given of the Application of Enbridge Gas Utah ("EGU" or "Company") to Increase Distribution Rates and Charges and Make Tariff Modifications, as more fully described below.

1. EGU is a division of Enbridge Inc., a Canadian corporation engaged in the business of supplying energy services in several states including Utah. EGU is a public utility subject to the Public Service Commission of Utah's (PSC) jurisdiction under Utah Code § 54-4-1.

2. On May 1, 2025, EGU filed an Application with supporting testimony, exhibits, and revised tariff sheets requesting the PSC approve the Company's revised tariffs and proposals to implement rate increases for various classes of service (see Paragraph 6, below). The request is based on an average 13-month forecasted test period ending December 31, 2026 ("Test Period").

3. If approved, the request would result in an annual increase, for a typical residential customer using 70 Dths, of approximately \$61 or 9.5 percent, beginning January 1, 2026.

4. EGU states the request is primarily driven by capital expenditures and related expenses, updated depreciation rates, and operating and maintenance costs that have increased since its last general rate case, filed with the PSC in 2022.

5. EGU proposes to increase its authorized return on equity from 9.6 percent to 10.6 percent with a proposed capital structure comprised of 53 percent equity and 47 percent debt. EGU bases its cost of debt of 4.25 percent in the Test Period on the current rates of outstanding debt issuances. EGU requests/proposes an overall authorized rate of return of 7.61 percent.

6. EGU's proposed rate increases by rate schedule are found in EGU Exhibit 5.10, which you may review online at:

<https://pscdocs.utah.gov/gas/25docs/2505706/25-057-06EGUExhibit5.10-RateDesign.xlsx>

7. EGU states it also proposes revisions to multiple sections of its tariffs to: eliminate outdated provisions and reflect Company practices, delete or move provisions or sections, clean up changes including rewording, referencing, punctuation, formatting, and grammatical corrections.

8. This is not a complete description of EGU's Application. You may review the Application and its supporting testimony and exhibits, at the PSC's offices or online at:
