

ANGC 1.19: The Direct Testimony of EGU witness Summers at page 17 indicates the telemetry required of each transportation customer that requires site visits for periodic maintenance. Please document:

a. The Company's maintenance schedule for telemetry at transportation customers' service locations, if the maintenance schedule varies by size or type of transportation customer or based on other factors, document such variances in the Company's scheduled maintenance activities;

b. The numbers of site visits to transportation customer service locations performed by the Company's personnel in each of the last three calendar years and in 2025 to date:

i. For scheduled maintenance of telemetry

ii. For required unscheduled maintenance of telemetry

Answer: a. The company maintains telemetry at transportation customer service locations at least once annually, or per the service agreement with customer, whichever is more frequent. Maintenance includes testing and calibration of all instrumentation and measurement equipment. Contractual variance (from typical annual) would generally be a result of customers with higher flows, delivery pressures, or gas quality requirements.

b. (i) 2022 – 1,169
2023 – 1,187
2024 – 1,134
*2025 (YTD) – 1,256

*All transportation customer maintenance is performed in Q1 or Q2. All maintenance for subject meters has been performed for 2025.

b. (ii) Unscheduled maintenance is not tracked, but reasonably estimated figures are provided below.

2022 – 640
2023 – 650
2024 – 630
2025 (YTD) – 330
