Energy Efficiency Program Proposal

ThermWise® Weatherization Rebates Program

Program Overview

Description

Enbridge Gas Utah (Enbridge Gas or the Company) is proposing to continue offering the ThermWise® Weatherization Program to Enbridge Gas residential GS customers in Utah. A qualifying single-family residence is an existing structure that has 1-3 residential dwelling units. A qualifying multifamily residence is an existing dwelling having four or more residential dwelling units. To qualify for insulation (wall, attic, and floor), air sealing, and duct-related rebates, customers will be required to have measures installed by a ThermWise® Authorized Contractor.

For qualifying multifamily residences, a pre-qualification inspection will be required. This program will offer incentives for qualifying weatherization measures. Weatherization measure delivery will leverage the marketing access and existing delivery channels of local businesses, wholesalers, and retailers.

Program Design

Program Measures

Qualifying Customers

Metered existing single-family or multifamily residences in Enbridge Gas Utah service territories that are billed on the GS rate schedule are eligible to participate in the ThermWise® Weatherization Rebates program.

Measure Eligibility

To receive a rebate, customers must submit a completed application form within six months of the installation date and provide all required documentation.

A Home Energy Plan will be required for participation in the air-sealing measure (excluding Direct Install contractors). Enbridge Gas Home Energy Experts may conduct a blower door test as part of the Home Energy Plan to determine eligibility. Only single-family residences are eligible for the air-sealing measure. Air-sealing participants must have attic insulation with a weighted R-value of R-49 or better once air-sealing specifications are achieved.

For a complete list of rebate-qualifying models for each measure and minimum efficiency requirements, please visit https://www.thermwise.com/equipment-specs/.

Program Rebates, Projected Participation and Savings

For 2027, the Company replaces the 2026 Tier 1 and Tier 2 attic insulation rebates with two separate options: (1) Attic Insulation – R-30, which provides a rebate of $0.32 per square foot when an increment of at least R-30 insulation is added; and (2) Attic Insulation – R-19, which provides a rebate of $0.10 per square foot when an increment of at least R-19, but less than R-30, insulation is added. Only one of these rebates may be received for the same attic area, and both options require a final attic insulation value of at least R-49 and not greater than R-60. Under the 2026 structure, the Tier 1 rebate of $0.32 per square foot (for an increment of at least R-19) and the Tier 2 rebate of $0.08 per square foot (for an increment of at least R-11) could be combined.

The Company also changes the single-family air sealing rebate in 2027 from $200 per job plus $0.10 per square foot of conditioned floor area, up to a maximum of $850, to $200 per job plus $0.08 per square foot, up to a maximum of $500. These changes are shown in Section 2.14 of the Company's Utah Tariff (EGU Energy Efficiency Exhibit 1.9).

Table 1 lists the projected 2027 participation and annual natural gas savings for each weatherization measure. These measures are available to residential customers who meet the measure eligibility requirements.

Table 1. Weatherization Projected Participation and Savings

Single Family (1-3 units)		
Measure	**Projected Participation**	**Total Projected Savings (annual Dth)**
Attic Insulation R-30	12,500	47,100
Attic Insulation R-19	6,800	7,046

Rebate

Floor Insulation	180	475
Wall Insulation	700	1,892
Windows - R-5	800	8,376
Duct Sealing & Insulation	175	1,918
Air Sealing	11,500	66,629
Pipe Insulation	5	5
Continuous Exterior Rigid Insulation	10	37
TOTAL Single Family	**32,670**	**133,479**
Multifamily (4 or more units)		
Measure	**Projected Participation**	**Total Projected Savings (annual Dth)**
Attic Insulation R-30	40	88
Attic Insulation R-19	40	70
Floor Insulation	5	12
Wall Insulation	10	34
Windows - R-5	5	70
Continuous Exterior Rigid Insulation	10	74
Duct Sealing & Insulation	5	57
TOTAL Multifamily	**115**	**405**
TOTAL Weatherization Program	**32,785**	**133,884**

Limitations

ThermWise® Weatherization Rebate program limitations are defined in Section 2.14 of the Company's Utah Tariff (EGU Energy Efficiency Exhibit 1.9).

Implementation

This program is currently in the marketplace. Upon Commission approval, implementation activities for the 2027 program year, including the proposed attic insulation and air sealing rebate changes, will begin January 1, 2027.

Administration

The program administration represents the ongoing delivery of the program. All internal systems, processes, and procedures have been created and are in place for 2027.
