¹The marker well is a representative well in the field (usually the deepest well). A dated mechanical log from such well was used to determine the top and base of the productive interval. Marker wells are not necessarily prior Company wells or prior Wexpro wells, as defined in the Agreement; they may be third-party wells.

²Marker well location may not be within a development drilling area, as defined in the Agreement; its selection is related to the productive formation and the reliability and quality of the data to indicate stratigraphic equivalency elsewhere in the formation.

³Top and base (feet below the surface) in the marker well: Extent of productive oil reservoir elsewhere is the stratigraphic equivalent of this interval; the areal extent of the productive oil reservoir is defined in the Agreement.
