

STATE OF UTAH
PUBLIC SERVICE COMMISSION

Date: March 2, 2001

To: All Parties in Docket No. 99-057-20

From: Julie Orchard

Regarding: The start of a New Questar Weatherization Program Docket

On August 11, 2000, the Utah Public Service Commission (Commission) approved a weatherization program to encourage conservation of resources. In the Questar Rate Case Docket No. 99-057-20 (Rate Case Docket), the Commission ordered Questar and the Division of Public Utilities (Division) to monitor the program and the Division to audit the program as it determines necessary or as ordered by the Commission.

Currently, the issue of weatherization is still a part of the Questar Rate Case Docket; however the Commission feels it would be more administratively efficient to separate the weatherization issue from the rate case docket and to start a new docket for the weatherization program. Therefore, as of March 2, 2001, all issues regarding the Questar Weatherization Program will be placed in a new docket numbered 01-057-04.

In this manner, the Commission can proceed with the weatherization program as a separate issue from the rate case filed in 1999. If there are any questions, feel free to contact the Commission at (801) 530-6716.
