RE: Docket No. 06-999-03

In the Matter of Consideration of the Amendment of 16 U.S.C. Section 2621 - Consideration and Determination Respecting Certain Ratemaking Standards for Electric Utilities by the Energy Policy Act of 2005

Dear Mr. Larsen:

The Commission is in receipt of Rocky Mountain Power's ("Company") Proposed Fossil Fuel Energy Efficiency Standard Plan filed on May 21, 2008. In this filing the Company provided a sample of the Standard Plan for the Huntington power plant, entitled Huntington Plant Heat Rate Improvement Plan, and proposed to file a complete plan for all of the plants by March 31 of each year, with the first full report due by March 31, 2009. The Company also committed to submit its summary of FERC Form 1 data at that time. The Company states that prior to this filing it prepared and circulated a draft sample plan to participants of the collaborative fossil fuel generation efficiency work group composed of members from the Commission staff, the Division of Public Utilities, the Committee of Consumer Services, and others, and that no additional comments were received.

The Commission has reviewed the Company's Proposed Fossil Fuel Energy Efficiency Standard Plan in the above referenced docket and looks forward to the filing of the first full report by March 31, 2009.

Sincerely,

/s/ Julie Orchard
Commission Secretary
