Subject: to the PSC - Questar Gas rate increase - rule change hostile to ratepayers

Dear PSC:

I need a break as I am soon to enter the world of the baby boomers/fixed income status. Any rate increases or policies leaning to increases are negative to baby boomers as we shall soon to be living on SS/retirement (skinny to say the least)/401's (if have any)/etc.! To assist me in my quest to encourage NO RATE INCREASES please hear me out:

Ratepayers voices must be heard in utility regulation ! **** are you pending a fixed income status? ****

Because the Div. of Public Utilities & Committee of Consumer Services aren't representing consumers' interests effectively. **** are you pending a fixed income status? ****

If the Commission is going to change its rules, the amendments should facilitate the participation of individual customers and groups, not impede them! **** are you pending a fixed income status? ****

If the Commission decides each participating individual or group must be represented by an attorney, either the Commission or the utility should pay those costs! **** are you pending a fixed income status? ****

Thank you for these considerations. I too will be having a challenge making ends meet pending my fixed income status & any increase(s) will become a hardship for me & many other baby boomers in UT!

I would like to attend the 9:30am Wednesday meeting, but have to work (at the age 65+) to keep ahead of this type pending utility increase(s)!

Sincerely,

David Brown
