Subject: PSC - Proposal to limit citizen comment

Public Service Commission Members:

I have noticed in the newspaper and on television news reports that there is an effort being proposed that will limit public participation in the rate review process. While it is true that I am not familiar with the details of the rate review process, I am very concerned about any limitation to public input and involvement. I strongly believe that there should be an open mike for the public to make comment and ask questions to the commission and the utility providers. I do not want to have to hire an attorney or other means to get input with the commission. Please leave the process as it is currently constituted or make it easier to give input from the general public. I strongly oppose any efforts to restrict or make it more difficult to be involved in the rate review process.

Dennis Hamblin
