Subject: NO to 801 area code overlay

Please do not move ahead with overlay of an additional area code to 801. I have never heard of such an ill conceived plan to solve a simple problem. If another area code is needed because of growth, then create one. Also, what happens when a third area code is needed.

We survived quite well when area code 435 was added. I was running a business in the new 435 area code, and yes it was an inconvenience to us, but an overlay of area codes would be a huge inconvenience to almost everyone.

Thank You,

Allan Edwards
