Subject: Area code 'overlay'---No! Area code 'split'---yes

Dear Utah Public Service Commission,

Please change the idea of overlaying area code 385 over the top of area code 801. Life is confusing enough with out that.

Instead, please just split area code 801 geographically, so one half will be 801 and the other half will be 385, That seems to be more logical.

Thank you - Marge Barlow
