COMMENT: This is about teh Area Code Overlay - Are those that decided with this new policy just stupid or on crack? How can every OTHER City and State figure out how to do this with out making it a pain in the @\$\$. Here is a suggestion... Walk outside and ask 10 people if they are looking forward to beign required to dial ALL 10 numbers instead of simply changing one area to the new area code. My question is: Did those who decided it ask anyone outside of their own office what would make sense to everyone else?
