This is the dumbest idea that ever existed. Overlap area codes.....who do you think that will impact the most??

Think of the children, think of the elderly.....how do you think they are going to remember 10 digits and whether they are the same area code as their friends/neighbors

Who ever the smart person was who decided this, obviously does not live in this area and perhaps needs to get some more education and perhaps not listen to businesses etc.....we pay the money not them

LEAVE THE AREA CODES ALONE AND MAKE A DEFINITE DIVISION AS TO THE AREA EACH CODE WILL COVER

Don't make the people pay for the bureacratic bungling

Thanks
