In the Matter of Electric Power Interconnection

In the Matter of an Investigation of Net Metering

DOCKET NO. 07-999-07

DOCKET NO. 07-999-08

NOTICE OF TECHNICAL CONFERENCE

-----------------------------------------------------------------------------------------------

ISSUED: August 20, 2007

By The Commission:

Notice is hereby given that a Technical Conference will be held in the above-entitled matters on **Wednesday, August 29, 2007 at 9:30 a.m.** with the Commission in Room 401 on the Fourth Floor of the Heber M. Wells Building, 160 East 300 South, Salt Lake City, Utah. The purpose of the technical conference is to determine a process or processes for implementation of the PURPA Interconnection Standard as previously adopted by the Commission in docket 06-999-03 and for an investigation of barriers to net metering. An agenda for the technical conference is attached as Appendix A.

Individuals wishing to participate by telephone should contact the Commission at (801) 530-6716 or toll-free 1-866-PSC-UTAH (1-866-772-8824) at least two days prior to the Conference to make arrangements. Participants attending by telephone should then call the Public Service Commission five minutes prior to the beginning of the Conference to ensure participation.

In compliance with the Americans with Disabilities Act, individuals needing special accommodations (including auxiliary communicative aids and services) during the
Conference should notify the Commission, at 160 East 300 South, Salt Lake City, Utah, 84111, (801) 530-6716, at least three working days prior to the Conference.

DATED at Salt Lake City, Utah, this 20th day of August, 2007.

/s/ Julie Orchard
Commission Secretary
G#54395 Docket No. 07-999-07
G#54396 Docket No. 07-999-08
I. Purpose: To determine a process or processes for implementation of the PURPA Interconnection Standard and for an investigation of net metering.

II. Introductions

III. Review of the PURPA Standard and the Commission’s Determination

IV. Discussion of goals, scope of work and options for completion

V. Issues List:
   a. Interconnection
      i) Current best practices/model interconnection codes
      ii) Regulatory gap
      iii) Removal of barriers and streamlining of process
      iv) Limitations in IEEE 1547
   b. Net Metering
      i) 25 kilowatt limitation
      ii) Inverter requirement
      iii) Discontinuation of program at .1% of electrical corporation’s 2001 peak demand
      iv) Charges or credits for net electricity – expiration of credits
      v) Division of Public Utility’s Net Metering Report
      vi) Removal of barriers
   c. Other issues

VI. Conclusions and further scheduling
