REQUEST TO OPEN DOCKET

To: Public Service Commission

From: Division of Public Utilities
Chris Parker, Director
Energy Section
Artie Powell, Manager
Matt Croft, Utility Analyst

Date: February 12, 2012

Subject: Request to Open Docket for Rocky Mountain Power's (Company) forthcoming 2013 Energy Balancing Account (EBA) filing.

RECOMMENDATION

The Division of Public Utilities (Division) requests that the Commission establish a docket number with respect to the Company's forthcoming 2013 EBA filing.

DISCUSSION

The Commission has ordered the Company to file its 2013 EBA application (covering calendar year 2012) on March 15, 2013. However, the Division has already begun its review of calendar year 2012 data and has issued data requests with respect to that data. Since no docket is presently open for the 2013 EBA application, the Division has issued these data requests under Docket No. 12-035-67. The Division believes that these and any future data requests addressing 2012 data would more properly be accounted for in a new EBA docket that represents calendar year 2012. The Division therefore requests the Commission establish a new EBA docket for the Company's forthcoming filing.
