Re: Request for Technical Conference on Energy Imbalance Market

In February of this year PacifiCorp announced an important partnership between the Company and the California Independent System Operator Corporation (ISO) that will result in the two organizations working together to achieve benefit for customers by establishing an energy imbalance market (EIM). PacifiCorp requests that the Commission schedule a technical conference on July 17, 2013, to address the EIM agreement with the Commission, your staff, and other interested parties. Representatives from PacifiCorp and the California ISO will be available at the technical conference to discuss the framework, operations, and the costs and benefits of the EIM agreement.

If you have any questions please contact Dave Taylor at 801-220-2923.

Sincerely,

Jeffrey K. Larsen
Vice President, Regulation and Government Affairs
