Re: Sole Source Contract with Water & Environmental Technologies PC

Commissioners:

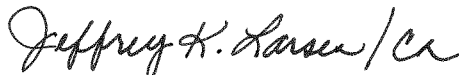

In accordance with the Company's procurement policy, we hereby notify you that PacifiCorp Energy, a Division of PacifiCorp, has entered into a sole source contract with Water and Environmental Technologies PC which exceeds \$500,000. The contract amount is \$600,000.

Water and Environmental Technologies (WET) has been a consulting partner to PacifiCorp Environmental Remediation Company (PERCo) for work at the Big Fork, Bridger Coal, Bridger FGD pond closure, Bridger Oil, Huntington GW CAP, Naughton FGD closure, and Wyodak Oil. Follow-up work is now required at each of these sites. WET is familiar with the scope of work to be performed at each of these sites and is licensed to run the software required by Wyoming Department of Environmental Quality to evaluate ground water. WET was selected as the most competitive bidder at the start of each project from the standpoint of technical expertise and costs. Rebidding the remainder of these projects would result in excess cost and could expose PacifiCorp to liability associated with the sensitive nature of these projects.

This sole source procurement contract was authorized August 22, 2013, by Micheal Dunn, President, PacifiCorp Energy.

If you have any questions, please feel free to contact Dave Taylor at (801) 220- 2923.

Sincerely,

Jeffrey K. Larsen
Vice President, Regulation & Government Affairs
