FOR INTERNAL USE ONLY – NOT TO BE DISTRIBUTED OR FORWARDED TO EXTERNAL PARTIES

On September 18, 2014, Colorado Interstate Gas Company L.L.C. received approval of its August 29, 2014 Annual FL&U filing in Docket No. RP14-1232-000. This order accepted the proposed FL&U percentages, effective October 1, 2014. No protests or adverse comments were filed. A copy of the letter order, the filing and the original e-mail is attached for your reference.

Please let me know if you have any additional questions or need additional information. Thank you.

Subject: CIG's Annual Fuel and LUF True-Up Filing in Docket No. RP14-1232-000

FOR INTERNAL USE ONLY – NOT TO BE DISTRIBUTED OR FORWARDED TO EXTERNAL PARTIES

Today CIG submitted the attached Annual Fuel and LUF Rate Adjustment filing (Docket No. RP14-1232-000). Below is a summary of the rate changes proposed to take effect on **October 1, 2014**.

Fuel Retention Percentages

The overall fuel retention percentages for mainline transmission, CIG Storage, High Plains GQC, and Totem Storage have decreased. The specific decreases are as follows: The fuel retention percentage on CIG's mainline transmission, which was 0.77% has been decreased to 0.46%. The fuel retention percentage for Storage has decreased by 0.10% from 0.81% to 0.71%. The fuel retention percentage for High Plains GQC has decreased by 0.27% from 0.50% to 0.23%. The fuel retention percentage for Totem Storage Fuel decreased by 0.20% from 1.48% to 1.28%. The only fuel retention percentage that has increased pertains to Rate Schedule CS-1 (Cheyenne jumper compression). The retention percentage for Rate Schedule CS-1 fuel has slightly increased by 0.02% from 0.28% to 0.30%.

L&U Retention Percentages

Due to the current positive economics of liquid processing revenues which are netted against losses in L&U, a net system gain, and the retention of L&U from April 2014-June 2014, CIG will continue to reflect a LUF percentage of 0.00% and proposes to refund its net over-collection of 880,052 Dth valued at \$3,885,467. CIG is also proposing to increase the High Plains Pipeline L&U retention percentage by 0.20% from 0.13% to 0.33%. The L&U retention percentage for CS-1 (Cheyenne jumper compression) has decreased by 0.16% from 0.16% to 0.00%.

Please let me know if you have any questions or need additional information.
