This should be included in Docket 16-999-12.

Thanks,

Gary

Mr. Haywood,

As noted in your email, costs are associated with the energy comparison programs that includes printing and frequency of issuing reports. The desire of the program is to provide information to assist customers with reducing electric and natural gas usage. The programs are periodically evaluated by the Public Service Commission. Customers can elect to discontinue participating in the programs if desired.

The Public Service Commission appreciates your interest and will consider such questions when reviewing the energy comparison programs.

Sincerely,

Gary Widerburg
Commission Secretary
Public Service Commission of Utah

Subject: Re: Residential Electric & Gas Reports

Mr. Haywood,

I do get the reports. I live in a neighborhood where the houses are of different sizes and years so the information is more difficult to compare. Factors that impact household energy consumption vary such as the size of households, type of appliances (electric or gas dryer) and so forth. Some people have told me the reports are helpful but I know there are different opinions on this topic.

Hope this help.

Gary

Thank you Mr. Widerburg.

Do you get these at your house? Just curious. Don't want to jeopardize you.

Dear Mr. and Mrs. Haywood,

Thank you for the feedback concerning the household energy comparison reports. I will forward your comments to the Commissioners for review and include your comments as part of Docket 16-999-12.

Sincerely,

Gary Widerburg

Hello. I we live in Layton. Each month we receive glossy 'Comparison Reports' in the mail from RMP & Questar.

While somewhat interesting these reports are actually pretty useless to us.

I have heard it is the PSC which has approved these reports. Is that true?

This is a waste of money at a lot of levels. We think these utilities should stop producing and mailing the reports. I suppose there could be an opt out, but then of course we end up subsidizing the mailings to those who don't. It would be better if they were only online, but the Utilities are still producing reports at a cost - ours!

How does the PSC know these reports produce the necessary savings required for your approval?

I know of no one who feels these things are of any use, many who just toss them in the trash. Crazy.

Seriously, do you as a citizen, not a PSC employee, actually DO anything as a result of getting your personal reports? We doubt it.

Thanks for taking our concern.
