

STAND UP FOR

SOLAR IN UTAH!

Dear Public Service Commissioners,

I strongly urge the Public Service Commission to adopt favorable net metering policies.

The continued growth of rooftop solar in Utah offers substantial gains for both the homeowner and the environment, with minimal impacts on other energy customers. Please reject Rocky Mountain Power's bid to protect its market share by levying unnecessary fees on rooftop solar: The benefits of distributed clean energy far outweigh the costs.

Please support rooftop solar and net metering.

Sincerely,

Name Danece Mangone
