FEDERAL ENERGY REGULATORY COMMISSION

UTAH PUBLIC SERVICE COMMISSION
2020 NOV -9 A 10:56
Sigurd Solar LLC) Docket No. EG21-___-000

RECEIVED
Notice of Self-Certification of Exempt Wholesale Generator Status

Pursuant to Section 366.7(a) of the Federal Energy Regulatory Commission's ("Commission") regulations¹ implementing the Public Utility Holding Company Act of 2005 ("PUHCA 2005"), enacted by the Energy Policy Act of 2005 §§ 1261 *et seq.*,² Sigurd Solar LLC ("Sigurd Solar") hereby submits this notice of self-certification that Sigurd Solar is an exempt wholesale generator ("EWG") as defined in Section 366.1 of the Commission's regulations.³

³18 C.F.R. § 366.1.

II. DESCRIPTION OF SIGURD SOLAR

A. Sigurd Solar's Facility and Power Sales

Sigurd Solar is an indirect subsidiary of D. E. Shaw & Co., L.P. Sigurd Solar is constructing and will own and operate an 80 MW (nameplate) solar-powered electric generating facility and associated interconnection facilities to be located in Sevier County, Utah (the "Facility"). The Facility will include limited electric interconnection facilities necessary to effectuate Sigurd Solar's wholesale power sales from the Facility.⁴ The Facility will be interconnected to the transmission system owned by PacifiCorp, located in the PacifiCorp-East balancing authority area ("PACE"). Sigurd Solar will sell electric energy, capacity, and/or ancillary services from the Facility exclusively at wholesale.⁵

⁴Sigurd Solar may occasionally obtain from third parties back-up power that Sigurd Solar may need for station power to operate its Facility when Sigurd Solar is not self-supplying its station power load. Such back-up or station power would be delivered to the Facility over the interconnection facilities that Sigurd Solar will use to interconnect with the PacifiCorp transmission system. EWGs may use their interconnection facilities to transmit back-up power to their generation facilities. *See Zond Systems, Inc.*, 81 FERC ¶ 61,001 (1997).

⁵Such sales will be made to third-parties through bilateral agreements or through a power exchange. The Commission has determined that sales through a power exchange are considered wholesale sales for EWG purposes. *See Southern California Edison Co.*, 80 FERC ¶ 61,262 (1997). Sigurd Solar may also purchase power and resell it at wholesale to third parties. An EWG is permitted to resell at wholesale power that it has not generated. *See CNG Power Services Corp.*, 71 FERC ¶ 61,378 (1995). Concurrently with the filing of this notice, Sigurd Solar will file an application requesting market-based rates from the Commission.

B. Sigurd Solar's Other Potential Incidental Activities

In connection with developing, owning, and operating the Facility, Sigurd Solar may also engage in the following incidental activities that the Commission has found to be permissible EWG activities:

- sell ancillary services available from the Facility that are incidental to, and by-products of, the Facility's operations as a wholesale power generator;⁶
- reassign excess transmission capacity consistent with the Commission's requirement that such reassignment of excess transmission capacity be limited to transmission capacity Sigurd Solar originally obtained for the purpose of affecting a specific wholesale sale of electric energy;⁷
- purchase and sell congestion revenue rights that Sigurd Solar needs for the Facility's power sale operations;⁸
- resell excess fuel supplies or assign its excess fuel transportation capacity provided that such sales be made only if such fuel supplies or transportation were originally contracted by Sigurd Solar to operate the Facility;⁹
- trade emission allowances consistent with the Commission's limitation that an EWG may only engage in such trading so long as the emission allowances were originally obtained in the normal course of operating the Facility;¹⁰

⁶The ancillary services Sigurd Solar may sell would include reactive power and voltage support, regulation and frequency response services, load following, energy balancing services, spinning and supplemental reserves, blackstart capability, and any other ancillary services consistent with the Commission's rules or as otherwise permitted by the Commission. See, e.g., *Duke Energy Oakland, LLC*, 83 FERC ¶ 61,304 (1998); *Sithe Framingham, LLC*, 83 FERC ¶ 61,106 (1998).

⁷See *CNG Power Services Corp.*, 71 FERC ¶ 61,026, at 61,103–04 (1995).

⁸See *Duquesne Power, LP*, 106 FERC ¶ 61,104 (2004).

⁹See *Selkirk Cogen Partners, L.P.*, 69 FERC ¶ 61,037, at 61,168–69 (1994).

¹⁰See *UGI Development Co.*, 89 FERC ¶ 61,192 (1999).

- sell “green” power certificates or credits consistent with the Commission’s limitation that an EWG may sell such certificates or credits where they are associated with power produced by the Facility;¹¹
- grant easement, lease, or rent property to third parties, but to the extent such an arrangement is not reasonably necessary to Sigurd Solar’s wholesale power business and a rental fee is received above a nominal amount, Sigurd Solar will, consistent with EWG precedent, donate or transfer such rental revenues to a non-affiliated entity;¹²
- engage in project development activities associated with the Facility. Such project development activities may include, but are not necessarily limited to, the following activities: due diligence; site investigations; feasibility studies; preliminary design and engineering; licensing and permitting; negotiation of asset and land acquisitions; negotiation of contractual commitments with lenders, equity investors, governmental authorities, and other project participants and such other activities as may be necessary to financially close on eligible facilities; negotiation of power sales contracts; equipment purchases; fuel supply; engineering, construction, interconnection, and related matters; preparation and submission of bid proposals; and development of financing programs related to owning or operating the Facility and/or additional electric generation facilities that satisfy the criteria for EWG status;¹³ and
- engage in other activities incidental to the sale of electric energy at wholesale that are consistent with the Commission’s EWG precedent.

¹¹See *Madison Windpower, LLC*, 93 FERC ¶ 61,270 (2000).

¹²See, e.g., *Duke Energy Hot Spring, LLC*, 98 FERC ¶ 61,287 (2002); *PSEG Fossil, LLC*, 95 FERC ¶ 61,405 (2001).

¹³See, e.g., *Empresa Valley Hermoso, S.A.*, 72 FERC ¶ 61,306 at 62,288 (1995). Sigurd Solar will, to the extent required by the Commission, file a new notification of EWG status if it acquires ownership and/or operating interests in any additional Eligible Facilities not described herein or EWGs.

III. REPRESENTATIONS REGARDING EXEMPT WHOLESALE GENERATOR STATUS

Sigurd Solar makes the following representations in order to demonstrate that it meets the Commission's definition of an EWG under Section 366.1 of the Commission's regulations:

- A. Other than the permissible incidental activities that Sigurd Solar may undertake as discussed in Section II.B., *supra*, Sigurd Solar will be engaged directly and exclusively in the business of owning and operating all or part of one or more Eligible Facilities¹⁴ and selling electric energy at wholesale. The Facility, including the interconnection facilities described in Section II.A. above, satisfy the definition of Eligible Facilities because they will be used for the generation of electric energy exclusively for sale at wholesale. Consistent with the Commission's EWG precedent, the activities described in Sections II.B. above that Sigurd Solar may engage in will be incidental to the wholesale generation business and will not violate the EWG exclusivity requirement.
- B. Sigurd Solar will not make any foreign sales of power at retail.
- C. The Facility does not include transmission or distribution facilities other than the interconnection facilities described in Sections II.A. above, which

¹⁴Section 366.1 of the Commission's regulation adopts by reference Section 32(a)(2) of the Public Utility Holding Company Act of 1935 ("PUHCA 1935"), 15 U.S.C. § 79z-5a(a)(2), which defines the term eligible wholesale facilities ("Eligible Facilities"). Thus, the term Eligible Facilities as used herein has the meaning ascribed to it in Section 32(a)(2) of PUHCA 1935.

are used to interconnect the Facility to the PacifiCorp transmission system. These interconnection facilities are necessary to effectuate Sigurd Solar's sale at wholesale of electric energy produced by its Facility.

D. No rate or charge for, or in connection with, the construction of the Facility or for electric energy produced by the Facility was in effect under the laws of any state as of October 24, 1992. Accordingly, no state commission determinations pursuant to Section 32(c) of the Public Utility Holding Company Act of 1935 are required.

E. No portion of the Facility will be owned or operated by an Electric Utility Company that is an Affiliate or Associate Company¹⁵ of Sigurd Solar.¹⁶

In accordance with Section 366.7(a) of the Commission's regulations,¹⁷ a copy of this notice of self-certification was concurrently served upon the Utah Public Utility Commission.

¹⁵The terms "Electric Utility Company," "Affiliate" and "Associate Company" have the meanings ascribed to them in Section 366.1 of the Commission's regulations.

¹⁶See *Buffalo Gap Wind Farm 2, LLC*, 118 FERC ¶ 61,069, at P 13 (interpreting Section 32(d)(1) of PUHCA 1935, incorporated into the definition of "exempt wholesale generator" in Section 366.1 of the Commission's regulations, "as not precluding co-ownership (or joint operation) by affiliated EWGs".)

¹⁷18 C.F.R. § 366.7(a).

IV. CONCLUSION

For the reasons set forth in this notice of self-certification, Sigurd Solar satisfies the requirements for EWG status.

Respectfully submitted,

/s/ Deborah A. Carpentier
