Hello,

Rocky Mountain Power recently completed a study of the potential benefits of participating in the Extended Day-Ahead Market (EDAM) and are sharing those findings with the commissions in the states where we serve customers. I am reaching out to request that the UPSC schedule a technical conference so RMP can present the information to the Commission and any other interested member of the public. This would also be an opportunity to answer any questions interested parties may have regarding RMP's future EDAM participation. No confidential or commercially sensitive information will be presented. Also, we are offering to attend in person, but are open to it being a virtual technical conference if that is preferable to the Commission. Two possible dates that we have identified for the technical conference are April 26 or 28 at any time of day that works for the Commission. If those dates do not work, I will look for some alternatives. We anticipate the presentation will be 1-2 hours.

Thank you in advance and please reach out if you have any questions.

Jana Saba
