RE: *PacifiCorp*
Docket No. ER24-_____

Dear Secretary Bose:

Pursuant to Section 205 of the Federal Power Act (“FPA”),¹ Section 35 of the Federal Energy Regulatory Commission’s (“Commission” or “FERC”) Rules of Practice and Procedure,² and Order No. 714³ regarding electronic filing of tariff submittals, PacifiCorp hereby submits limited revisions to its transmission formula rate template (“Transmission Formula Rate Template” or “Transmission Formula Rate”) to include the interest that PacifiCorp is required to pay on interconnection study and commercial readiness deposits and payments in the Annual Transmission Revenue Requirement (“ATRR”) of PacifiCorp’s Transmission Formula Rate.⁴

PacifiCorp’s ATRR does not presently include such interest. However, PacifiCorp’s current Large Generator Interconnection Procedures (“LGIP”) require payment of interest, as does Order No. 2023, which includes requirements that interest be paid when returning refundable portions of interconnection study deposits, Commercial Readiness Deposits,⁵ and payments in lieu of site control.⁶ The proposed Transmission Formula Rate Template revisions impact a limited number of lines in Appendix A, tab “Summary of Rates”, Note 1 on Attachment 3, and Attachment 5 of Attachment H-1 of PacifiCorp’s OATT. The specific revisions are set forth below in Table 1.

PacifiCorp respectfully requests the Commission accept the Transmission Formula Rate Template revisions effective 61 days after this filing or January 17, 2024.

4 Except as defined in this transmittal letter, capitalized terms shall have the meanings set forth in PacifiCorp’s Open Access Transmission Tariff (“OATT”).

5 The term “Commercial Readiness Deposit” is a new defined term in Order No. 2023. *See Improvements to Generator Interconnection Procs. & Agreements*, Order No. 2023, 184 FERC ¶ 61,054, Appendix C: *Pro forma LGIP* § 1, (“*Pro forma LGIP*”), *order on reh’g*, 185 FERC ¶ 61,063 (2023), *appeal docketed*, Nos. 23-1282, *et al.* (D.C. 6 *See id.*, *Pro forma LGIP* § 1.

I. Background and Reason for Filing

a. PacifiCorp's Transmission Formula Rate.

On May 23, 2013, the Commission accepted a settlement agreement in Docket No. ER11-3643, which implemented a formula transmission rate for PacifiCorp.⁷ Under the Transmission Formula Rate, the charges PacifiCorp assesses for Point-to-Point Transmission Service and Network Integration Transmission Service are calculated annually using the ATRR.

b. PacifiCorp's existing LGIP requires payment of interest on interconnection deposits and interconnection payments.

Section 48.3.2 of PacifiCorp's existing LGIP requires the payment of interest on refundable portions of interconnection study deposits, payments made in lieu of demonstrating commercial readiness, Site-Control deposits, and additional Financial Security payments. In particular, Section 48.3.2 states:

In the event of Interconnection Customer's Withdrawal pursuant to Section 38.7, Transmission provider shall refund to Interconnection Customer any of the refundable portion of the following charges: (a) any study deposit paid pursuant to Section 38.1; (b) \$3,000 per MW deposit paid pursuant to Section 38.4.1(v)(d); (c) any Site Control-related deposit paid pursuant to Section 38.4.1(iii); and (d) additional Financial Security payment for Network Upgrade costs paid pursuant to Section 43.1(c). Such refundable portion shall be any amount that exceeds Interconnection Customer's share of the costs that Transmission Provider has incurred (such as study costs) *including interest calculated in accordance with Section 35.19a(a)(2) of FERC's regulations*, and that exceed any Withdrawal Penalty imposed, if applicable. (emphasis added).⁸

c. Order No. 2023.

As noted earlier, Order No. 2023 requires interest to be paid to Interconnection Customers on refundable portions of interconnection study deposits, Commercial Readiness Deposits, and payments in lieu of site control. In particular, Section 3.7 of the *Pro forma* LGIP states:

If Interconnection Customer withdraws its Interconnection Request or is deemed withdrawn by Transmission Provider under Section 3.7 of this LGIP, Transmission Provider shall (i) update the OASIS Queue Position posting; (ii) impose the Withdrawal Penalty described in Section 3.7.1 of this LGIP; and (iii) refund to Interconnection Customer any portion of the refundable portion of Interconnection Customer's study deposit [or study payments] that exceeds the costs that Transmission Provider has incurred, *including interest calculated in accordance*

⁷ *PacifiCorp*, 143 FERC ¶ 61,162 at P 4 (2013). The settlement agreement is referred to herein as the "Settlement Agreement."

⁸ PacifiCorp – Transmission OATT and Service Agmts, Part IV.48, Miscellaneous, § 48.3.2 (5.0.0).

with Section 35.19a(a)(2) of FERC's regulations. Transmission Provider shall also refund any portion of the Commercial Readiness Deposit not applied to the Withdrawal Penalty and, if applicable, the deposit in lieu of site control. (emphasis omitted and added).⁹

- d. The interest payments are prudently incurred costs of providing service that PacifiCorp is entitled to recover.

PacifiCorp's Transmission Formula Rate does not currently include the expense for paying interest that is required under the LGIP. Nonetheless, the interest is a legitimate and required cost for PacifiCorp to provide interconnection service. Under the FPA, a utility is entitled to recover its prudently incurred costs of providing service.¹⁰ Therefore, it is just and reasonable to include this interest expense in the ATRR for recovery.

II. Summary of Proposed Changes to the Transmission Formula Rate

PacifiCorp proposes revisions to a limited number of lines in Appendix A, tab "Summary of Rates", a note on Attachment 3, and an added line to Attachment 5 of Attachment H-1 of PacifiCorp's OATT as specified in below table.

III. Enclosures

In addition to this transmittal letter, this filing consists of the following enclosures:

- Enclosure 1 – Revised Attachment H-1 of PacifiCorp’s OATT (clean version); and
- Enclosure 2 – Revised Attachment H-1 of PacifiCorp’s OATT (including red-lined version of Appendix A, Summary of Rates, Attachment 3 and Attachment 5 compared to currently effective version).

Because of the section-based nature of PacifiCorp’s eTariff filing of its OATT, PacifiCorp includes its complete Attachment H-1 of its OATT in clean and red-lined versions, even though the only changes concern Appendix A, Summary of Rates, Attachment 3 and Attachment 5, as described herein.

IV. Effective Date and Request for Waiver

As noted earlier, PacifiCorp respectfully requests the Commission accept the proposed revisions to the Transmission Formula Rate Template 61 days after the date of this filing or January 17, 2024.

Appendix A - Formula Rate**

Shaded cells are inputs	Notes	Reference (FERC Form 1 reference, attachment, or instruction)
-------------------------	-------	---

Notes

- A Line 16 includes New Transmission Plant to be placed in service in the current calendar year. Projected capital additions will include only the capital costs associated with plant expected to be energized and placed in service (as defined by the Uniform System of Accounts) in that month. The True-Up Adjustment will reflect the actual date the plant was energized and placed in service.
- B Includes Transmission portion only.
- C Annual membership dues (e.g., for EPRI, NEETRAC, SEPA and NCTA) are excluded from the calculation of the ATRR and charges under the Formula Rate and are subtracted from Total A&G. Total A&G does not include lobbying expenses.
- D Includes all Regulatory Commission Expenses.
- E Includes Regulatory Commission Expenses directly related to transmission service.
- F Property Insurance excludes prior period adjustment in the first year of the formula's operation and reconciliation for the first year.
- G The calculation of the Reconciliation revenue requirement according to Step 7 of Attachment 6 ("Estimate and Reconciliation Worksheet") shall reflect the actual tax rates in effect for the Rate Year, as defined in Attachment H-2, being reconciled ("Test Year"). When statutory marginal tax rates change during such Test Year, the effective tax rates used in the formula shall be weighted by the number of days each such rate was in effect. For example, a 35% rate in effect for 120 days superseded by a 40% rate in effect for the remainder of the year will be calculated as: $((.3500 \times 120) + (.4000 \times 245))/365 = .3836$.
- H No change in ROE will be made absent a filing at FERC.
PacifiCorp will include actual PBOP expense until changed as the result of a filing at FERC. PacifiCorp will include in the Annual Update Informational Filing its annual actuarial valuation report to support its Depreciation rates shown in Attachment 8 are fixed until changed as the result of a filing at FERC.
- I The 12 CP monthly peak is the average of the 12 monthly system peaks calculated as the Network customers Monthly Network Load (Section 34.2 of the OATT) plus the reserve capacity of all long term firm point-to-point customers.
- J Amount of transmission plant excluded from rates per Attachment 15.
- K Adjustment reflects exclusion of tax receivables due to 2008 NOLs, which resulted in MidAmerican Energy Holdings Company delivering refund to PacifiCorp.
- L Any gain from the sale of land included in Land Held for Future Use in the Formula Rate received during the Rate Year, as defined in Attachment H-2, shall be used to reduce the ATRR in the Rate Year. The Formula Rate shall not include any losses on sales of such land.
- M The Update uses end of year balances and the True-up uses 13 monthly averages shown on Attachment 5.
- N The Update uses end of year balances and the True-up uses the average of beginning of year and end of year balances shown on Attachments.
- O Placeholder that is zero until PacifiCorp receives authorization by FERC to include amounts.
- P Projected capital additions will include only the capital costs associated with plant expected to be energized and placed in service (as defined by the Uniform System of Accounts) in that month. The True-Up Adjustment will reflect the actual date the plant was energized and placed in service.
- Q The equity ratio is capped at 53%, and if the actual equity ratio exceeds 53%, then the debt ratio will be equal to 1 minus the preferred stock ratio minus 53%.
- R PacifiCorp will include only the gains and losses on interest rate locks for new debt issuances. Attachment 14 – Cost of Capital Detail will list the unamortized balance and annual amortization for all gains and losses on hedges.
- S PacifiCorp shall use FERC's 1/8th method for cash working capital subject to the following limitations:
 - (a) PacifiCorp shall be required to file a lead-lag study justifying the appropriate cash working capital allowance to be effective, subject to refund, as of June 1, 2014; provided, however, that if PacifiCorp does
 - (b) PacifiCorp shall provide a draft to the other Parties of any such lead-lag study at least sixty (60) days prior to making any filing described in (a) with the Commission; and
 - (c) Filing of the lead-lag study in (a) above, but not any subsequent filing affecting or relating to PacifiCorp's cash working capital allowance as permitted in subsection (a) above, may be a single issue FPA
- T These line items will include only the balances associated with long-term debt and shall exclude balances associated with short-term debt.

Line 1	New Plant Carrying Charge			
Line 2	Fixed Charge Rate (FCR) if not Contributions in Aid of Construction (CIAC)			
	Formula Line			
Line 3	A	157	Net Plant Carrying Charge without Depreciation	0.0000%
Line 4	B	164	Net Plant Carrying Charge per 100 Basis Point in ROE without Depreciation	0.0000%

The FCR resulting from Formula in a given year is used for that year only.
Therefore actual revenues collected in a year do not change based on cost data for subsequent years
In the True-up, the actual depreciation expense will be used.
Columns and rows may be added to accommodate more projects

- Depreciation Rates shown in rows 1 through 22 were approved by each of the Company's respective state jurisdictions during the last depreciation study. Washington rate for 389.2 on line 11 was added after the last depreciation study.
- The columns labeled "Balance" are the amount of investment physically located in each state.
- The plant balance is updated each month as new plant is added.
- The balances to be reported in the columns labeled "Balances" in any update are the weighted 13-month average balances for the rate year.
- "Company Rate" shows the depreciation rate approved by all of the jurisdictions on a total company basis.
- Unclassified Transmission represents the transmission additions placed in service but not yet classified to a FERC level account. Monthly depreciation is calculated by multiplying the month's beginning unclassified balance by the monthly transmission composite depreciation rate.
- Unclassified General represents the general plant additions placed in service but not yet classified to a FERC level account. Monthly depreciation is calculated by multiplying the month's beginning unclassified balance by the monthly state general plant composite depreciation rate.
- Transfers into the General amortized accounts (rows 13 through 21) are depreciated over the remaining life based on the account life.
- Depreciation expense for General plant is decreased by the amount that is billed to joint owners for computer hardware.
- Intangible and Leasehold Improvements (rows 23 through 25) are composite rates based on the 13 month average balance divided into the 2020 amortization expense for each account.
- Amortization expense for Intangible is decreased by the amount that is billed to joint owners for computer software.
- If the depreciation rates shown differ from the depreciation rates used to calculate the depreciation expense reported in FN1, then PacifiCorp is required to file under Section 205 for a modification of this Attachment or the calculation of depreciation expense and accumulated depreciation under this formula
- Some intangible assets in FERC accounts 302 and 303 have been excluded from balances in the calculation of composite Company depreciation rates: Hydro License Settlement Obligations and Gas Plant Intangibles.
- FERC Sub-accounts 353.7 (Supervisory Equipment), 356.2 (Clearing & Grading), and 390.3 (Structures and Improvements - Office Panels) were previously shown on separate lines on Attachment 8, but the depreciation rates for these aforementioned categories/FERC Accounts have been combined into their main accounts due to immateriality.
- New FERC Sub-account 391.3 (Office Furniture and Equipment – Equipment) is a new FERC account with a different depreciation rate than the main FERC account 391.0, and was therefore added to reflect the current status.

Appendix A - Formula Rate

Shaded cells are inputs	Notes	Reference (FERC Form 1 reference, attachment, or instruction)
-------------------------	-------	---

Notes

- A Line 16 includes New Transmission Plant to be placed in service in the current calendar year. Projected capital additions will include only the capital costs associated with plant expected to be energized and placed in service (as defined by the Uniform System of Accounts) in that month. The True-Up Adjustment will reflect the actual date the plant was energized and placed in service.
- B Includes Transmission portion only.
- C Annual membership dues (e.g., for EPRI, NEETRAC, SEPA and NCTA) are excluded from the calculation of the ATRR and charges under the Formula Rate and are subtracted from Total A&G. Total A&G does not include lobbying expenses.
- D Includes all Regulatory Commission Expenses.
- E Includes Regulatory Commission Expenses directly related to transmission service.
- F Property Insurance excludes prior period adjustment in the first year of the formula's operation and reconciliation for the first year.
- G The calculation of the Reconciliation revenue requirement according to Step 7 of Attachment 6 ("Estimate and Reconciliation Worksheet") shall reflect the actual tax rates in effect for the Rate Year, as defined in Attachment H-2, being reconciled ("Test Year"). When statutory marginal tax rates change during such Test Year, the effective tax rates used in the formula shall be weighted by the number of days each such rate was in effect. For example, a 35% rate in effect for 120 days superseded by a 40% rate in effect for the remainder of the year will be calculated as: $((.3500 \times 120) + (.4000 \times 245))/365 = .3836$.
- H No change in ROE will be made absent a filing at FERC.
PacifiCorp will include actual PBOP expense until changed as the result of a filing at FERC. PacifiCorp will include in the Annual Update Informational Filing its annual actuarial valuation report to support its Depreciation rates shown in Attachment 8 are fixed until changed as the result of a filing at FERC.
- I The 12 CP monthly peak is the average of the 12 monthly system peaks calculated as the Network customers Monthly Network Load (Section 34.2 of the OATT) plus the reserve capacity of all long term firm point-to-point customers.
- J Amount of transmission plant excluded from rates per Attachment 15.
- K Adjustment reflects exclusion of tax receivables due to 2008 NOLs, which resulted in MidAmerican Energy Holdings Company delivering refund to PacifiCorp.
- L Any gain from the sale of land included in Land Held for Future Use in the Formula Rate received during the Rate Year, as defined in Attachment H-2, shall be used to reduce the ATRR in the Rate Year. The Formula Rate shall not include any losses on sales of such land.
- M The Update uses end of year balances and the True-up uses 13 monthly averages shown on Attachment 5.
- N The Update uses end of year balances and the True-up uses the average of beginning of year and end of year balances shown on Attachments.
- O Placeholder that is zero until PacifiCorp receives authorization by FERC to include amounts.
- P Projected capital additions will include only the capital costs associated with plant expected to be energized and placed in service (as defined by the Uniform System of Accounts) in that month. The True-Up Adjustment will reflect the actual date the plant was energized and placed in service.
- Q The equity ratio is capped at 53%, and if the actual equity ratio exceeds 53%, then the debt ratio will be equal to 1 minus the preferred stock ratio minus 53%.
- R PacifiCorp will include only the gains and losses on interest rate locks for new debt issuances. Attachment 14 – Cost of Capital Detail will list the unamortized balance and annual amortization for all gains and losses on hedges.
- S PacifiCorp shall use FERC's 1/8th method for cash working capital subject to the following limitations:
 - (a) PacifiCorp shall be required to file a lead-lag study justifying the appropriate cash working capital allowance to be effective, subject to refund, as of June 1, 2014; provided, however, that if PacifiCorp does
 - (b) PacifiCorp shall provide a draft to the other Parties of any such lead-lag study at least sixty (60) days prior to making any filing described in (a) with the Commission; and
 - (c) Filing of the lead-lag study in (a) above, but not any subsequent filing affecting or relating to PacifiCorp's cash working capital allowance as permitted in subsection (a) above, may be a single issue FPA
- T These line items will include only the balances associated with long-term debt and shall exclude balances associated with short-term debt.

- Depreciation Rates shown in rows 1 through 22 were approved by each of the Company's respective state jurisdictions during the last depreciation study. Washington rate for 389.2 on line 11 was added after the last depreciation study.
- The columns labeled "Balance" are the amount of investment physically located in each state.
- The plant balance is updated each month as new plant is added.
- The balances to be reported in the columns labeled "Balances" in any update are the weighted 13-month average balances for the rate year.
- "Company Rate" shows the depreciation rate approved by all of the jurisdictions on a total company basis.
- Unclassified Transmission represents the transmission additions placed in service but not yet classified to a FERC level account. Monthly depreciation is calculated by multiplying the month's beginning unclassified balance by the monthly transmission composite depreciation rate.
- Unclassified General represents the general plant additions placed in service but not yet classified to a FERC level account. Monthly depreciation is calculated by multiplying the month's beginning unclassified balance by the monthly state general plant composite depreciation rate.
- Transfers into the General amortized accounts (rows 13 through 21) are depreciated over the remaining life based on the account life.
- Depreciation expense for General plant is decreased by the amount that is billed to joint owners for computer hardware.
- Intangible and Leasehold Improvements (rows 23 through 25) are composite rates based on the 13 month average balance divided into the 2020 amortization expense for each account.
- Amortization expense for Intangible is decreased by the amount that is billed to joint owners for computer software.
- If the depreciation rates shown differ from the depreciation rates used to calculate the depreciation expense reported in FN1, then PacifiCorp is required to file under Section 205 for a modification of this Attachment or the calculation of depreciation expense and accumulated depreciation under this formula
- Some intangible assets in FERC accounts 302 and 303 have been excluded from balances in the calculation of composite Company depreciation rates: Hydro License Settlement Obligations and Gas Plant Intangibles.
- FERC Sub-accounts 353.7 (Supervisory Equipment), 356.2 (Clearing & Grading), and 390.3 (Structures and Improvements - Office Panels) were previously shown on separate lines on Attachment 8, but the depreciation rates for these aforementioned categories/FERC Accounts have been combined into their main accounts due to immateriality.
- New FERC Sub-account 391.3 (Office Furniture and Equipment – Equipment) is a new FERC account with a different depreciation rate than the main FERC account 391.0, and was therefore added to reflect the current status.
