

Commnet Four Corners, LLC
Broadband Services Rate Comparability Certification
Form 481, Line 1030

The company must certify its current rate for broadband services is no more than the reasonably comparable benchmark amount, as set by the Wireline Competition Bureau and Office of Economics and Analytics. See 47 C.F.R. § 54.313(a)(3). If a carrier offers at least one broadband service plan with pricing lower than the relevant benchmark amount, it meets the regulation's requirement.

Through public notice DA 22-1338 (released December 16, 2022) and the "United States 2022 Broadband Benchmark Calculator," the Commission established a benchmark price of \$90.98 for internet speeds of 25 Mbps download/3 Mbps upload with no monthly data cap. For this filing period, the Commission has set the minimum monthly usage allowance at 600 GB.

Commnet Four Corners, LLC's broadband service rate is \$55.00 monthly for a plan with a speed of 25 Mbps/3 Mbps and 1 TB of monthly usage allowance. As the monthly rate and usage allowance are within the Bureau's guidance, Commnet Four Corners, LLC certifies compliance with its requirement to offer reasonably comparable broadband service at rates similar to those available in urban markets.
