

SCHEDULE NO. 13- CONDITIONS RELATED TO INTRASTATE ACCESS SERVICES (T)

This tariff is to set forth rates and procedures for the implementation for FGB, FGC, FGD, Toll Free and 900 service within its Utah exchanges. These rates will be applicable to all Carriers who, accept or terminate traffic, to or from, Beehive's local exchange customers. Beehive is adopting a new Tandem Switched Transport Termination rate that will be applied according to whether an intermediate tandem is involved, rather than the three (3) Tandem Switched termination charges previously applied. Beehive will bill \$0.008178 per minute in those instances where no intermediate tandem is involved. Beehive will charge \$0.024534 per minute in those instances where an intermediate tandem is involved. Such change will be revenue neutral.

Beehive's charges for originating and terminating traffic will be outlined in Schedule A. Beehive's records of such duration will be the sole documents for billing and accountability to these transactions. A 1.5% per month fee will be applied to any account (not paid) over 30 days.

Beehive routes traffic to and from its Utah exchanges partly over facilities owned by other companies. Beehive makes no representation that those carriers may not also bill the carrier for some aspect of their carriage of Beehive's traffic.

The following miscellaneous activities, as available, (other than a \$5 pre-subscription or change fee) may be charged to the requesting carrier on a cost basis, with a minimum charge of \$53 for the first hour of BTC time.
