to me

Hi Shauna,

In the meeting that was held yesterday regarding UTAP, I was told that it will be at least 2-3 years before any work is done to move the application for UTAP into eShare. This means that the SEAL team needs to evaluate what is required and expected from you in order to determine how best to administer the program with the new FCC requirements going forward and what the cost will be. We then need to agree on a contract for the administration of UTAP. I was told yesterday that the contract that you have been working on with the other DWS team is no longer a consideration at this point.

Can you send me what the requirements and expectations are from the PSC and DPU for the administration of UTAP in order to meet the FCC requirements? If there are any time sensitive dates that we need to be aware of, please include those as well. We will then review them and set up a meeting to discuss how we go forward.

thanks,
Sue
