

**Wireless Originated 8XX Jointly Provided Switched Access (“JPSA”) Amendment
to the Interconnection Agreement between
Qwest Corporation
and
Verizon Wireless
for the State of Utah**

This is an Amendment (“Amendment”) for Wireless Originated 8XX Jointly Provided Switched Access (“JPSA”) traffic to the Interconnection Agreement between Qwest Corporation (“Qwest”), a Colorado corporation, and the Verizon Wireless entities on the signature page of this Amendment (collectively “VZW”). Qwest and VZW shall be known jointly as the “Parties”.

RECITALS

WHEREAS, the Parties entered into an Interconnection Agreement, for services in the State of Utah (“Agreement”); that was approved by the Public Service Commission of Utah (“Commission”); and

WHEREAS, the Parties agree to amend the Agreement under the terms and conditions contained herein.

AGREEMENT

NOW THEREFORE, in consideration of the mutual terms, covenants and conditions contained in this Amendment and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

Amendment Terms

The Agreement is hereby amended by adding terms and conditions to accommodate a CLEC’s (the “VERIZON CLEC”) request described below. Such additional terms and conditions are set forth in Attachment 1 to this Amendment, attached hereto and incorporated herein by this reference. The Parties agree that VZW wants to route unqueried 8XX traffic to VERIZON CLEC for the 800 database dip, and to route the queried traffic to IXCs served by Qwest as Jointly Provided Switched Access (JPSA) traffic via VERIZON CLEC’s LIS trunks. VZW understands that VERIZON CLEC’s Interconnection Agreement with Qwest, in this State, will be amended as well to reflect VERIZON CLEC’s obligations.

Effective Date

This Amendment is subject to approval by the Commission; however, the Parties agree to implement the provisions of this Amendment upon execution. To accommodate such implementation, VZW has provided Qwest with a list of all NPA/NXXs and CLLIs associated with VZW switches which will be implementing this solution, CLLIs associated with the VERIZON CLEC switches which will be implementing this solution plus any additional information reasonably required by Qwest to make the internal system updates necessary to implement this solution. VZW will not begin sending 8XX traffic to VERIZON CLEC until VERIZON CLEC and Qwest have their systems in place and have been updated. Qwest shall complete all such billing system updates within a reasonable time.

Further Amendments

Except as modified herein, the provisions of the Agreement shall remain in full force and effect. The provisions of this Amendment, including the provisions of this sentence, may not be amended, modified or supplemented, and waivers or consents to departures from the provisions of this Amendment may not be given without the written consent thereto by both Parties' authorized representative. No waiver by any Party of any default, misrepresentation, or breach of warranty or covenant hereunder, whether intentional or not, will be deemed to extend to any prior or subsequent default, misrepresentation, or breach of warranty or covenant hereunder or affect in any way any rights arising by virtue of any prior or subsequent such occurrence.

Entire Agreement

The Agreement as amended (including the documents referred to herein) constitutes the full and entire understanding and agreement between the Parties with regard to the subjects of the Agreement as amended and supersedes any prior understandings, agreements, or representations by or between the Parties, written or oral, to the extent they relate in any way to the subjects of the Agreement as amended.

The Parties intending to be legally bound have executed this Amendment as of the dates set forth below, in multiple counterparts, each of which is deemed an original, but all of which shall constitute one and the same instrument.

ATTACHMENT 1

Wireless Originated 8XX Jointly Provided Switched Access (JPSA)

TYPE 2 INTERCONNECTION

Jointly Provided Switched Access Traffic, as defined in this Amendment, is a type of traffic that can be exchanged under the Agreement. Jointly Provided Switched Access Traffic is associated with Meet-Point Billing. The Parties will use industry standards developed and routed based on the LERG to handle the Provisioning and Billing of Jointly Provided Switched Access (MECAB, MECOD, and Qwest's FCC and state access Tariffs).

Jointly Provided Switched Access Services

Jointly Provided Switched Access Service is defined and governed by Qwest FCC and State Access Tariffs, Multiple Exchange Carrier Access Billing (MECAB) and Multiple Exchange Carrier Ordering and Design (MECOD) Guidelines and based on LERG routing; Jointly Provided Switched Access Service is not modified by any provisions of this Agreement. Both Parties agree to comply with such guidelines. VZW will update the LERG to reflect that VERIZON CLEC is the "800 SSP" for VZW's MSC.

Qwest, with VZW's support, will take the approach as outlined below to national committees to determine if documents and processes require updating to specifically address this proposal. The LERG does not specifically address this service beyond the population of 800 SSP. VZW and Qwest agree to modify this Agreement to reflect applicable new industry standards.

It is anticipated by Qwest and VZW that the originating, intermediate, and terminating LECs for switched access will cooperatively determine the Jointly Provided Switched Access ("JPSA") arrangements.

VZW will be set up with Qwest as a "Meet Point Billing" carrier, which means that billing by Qwest to IXCs for this traffic is based on Qwest FCC Access Tariff No. 1, section 2.4.7.

Qwest will use a "proposed Billed Percentage ("BP")" in its billing tables as further outlined below. JPSA routes will be established in Qwest's tables as follows:

For traffic that terminates to VZW via Type 2 trunks from Qwest, the proposed BP will be 100%. Qwest and the NECA 4 Tariff route will show only Qwest and VZW.

For 8XX traffic originated by VZW, sent to VERIZON CLEC and then to Qwest via the LIS facilities in place between VERIZON CLEC and Qwest, the proposed BP will equal the current BP between Qwest and VERIZON CLEC (generally 0% Qwest), and the route will show only two parties – VZW and Qwest. If it is determined later that these routes will be filed in NECA, VZW acknowledges this route would then include VERIZON CLEC as an intermediate carrier although the Qwest BP would be unchanged but the Parties agree that VERIZON CLEC would be 100%.

Once the solution is implemented, VZW agrees to the same record exchange for any other JPSA traffic they might send via Type 2 trunks through Qwest to IXCs. VZW will not receive

Category 11 JPSA records from Qwest for JPSA traffic that terminates to VZW. VZW will notify Qwest if they determine in the future that they want to receive the created records from Qwest for any IXC traffic that terminates to them via the Type 2 trunks they have with Qwest.

If requested by VZW, Qwest will also provide a one-time notification to VZW of the billing name, billing address and Carrier identification codes of the IXCs subtending any Access Tandem Switches to which VZW directly connects.

Qwest agrees to function as the Access Service Coordinator (ASC) as defined in the Multiple Exchange Carrier Ordering and Design Guidelines (MECOD) (Technical Reference SR-TAP-000984). Qwest will provide the operational, technical and administrative support required in the planning, provisioning and maintenance involved in the joint access provisioning process to the IXCs.
