Management Biographies

Robert Brown – President – YipTel, L.L.C.

Robert Brown comes from a long family history in the Utah Telecommunications market. In 1970 at the divestiture of bell companies Roberts father, Brent Brown sold and installed the first privately owned and operated Phone system the State of Utah. The company was called BCS, Business Communications Systems and they grew rapidly throughout the 70's. Later Brent sold the company to CCI (Central Communications Inc.) in Phoenix and then a few years later purchased the company back. Although the company name is still Central Communications Inc. Robert changed to a DBA of Intellisys. Robert has always enjoyed technology and became a Novell CNE in the late 90's as he could see the direction of the telecom industry and wanted to make sure that he was leading the Market with VoIP and Computer Telephone technologies. Robert has sold, designed, and implemented thousands of telecommunications solutions for clients around the world. The primary focus has been on the Utah market although they have deployed solutions across the country and internationally as well. Robert joined CCI in 1994 and purchased the company just 8 years later in 2002 and the company has enjoyed consistent growth over the last 10 years.

Robert knew that VoIP was the wave of the future and Intellisys began selling VoIP solutions in 1997. They became VoIP experts and have installed thousands of VoIP solutions to clients like Ken Garff Automotive, LANDesk, Bank of Utah, Okland Construction, Deseret First Credit Union and many more. Robert has designed and implemented thousands of MPLS, Dial tone, internet and WAN implementations. Robert is among the most knowledgeable and most reputable VoIP experts within the industry and delivers solutions to his clients that allow them to reduce their costs and better compete within their market.

In 2009 Robert's savvy business experience told him that the market was about to change and that hosted or Cloud based phone systems and technologies were about to explode. Thus Robert and his team launched a new company YipTel, llc. YipTel was created to meet the new and demanding needs of cloud based delivery of VoIP PBX technologies. YipTel is a hosted VoIP

provider that delivers hosted PBX services to its clients across DSL, EOC, MPLS, and other shared and dedicated circuits. In the beginning YipTel was funded by Intellisys and thus has strong financial backing with no debt and excellent growth and performance history. YipTel has experienced exceptional growth due to the cost effective and reliable delivery of VoIP services to their clients. YipTel's exceptional dedication to customer service, the flexibility of the platform, and the cost effective delivery of service have allowed YipTel to experience year over year growth of over 100%.

YipTel is a valuable asset to business in Utah as they provide new and innovative products that deliver cost savings and powerful applications that allow our clients to better compete in the market place. In order to deliver a complete solution and better serve our Utah clients YipTel is becoming a CLEC. This will allow YipTel to expand its growth and deliver new technologies to their clients.

Jeff Limb – Chief Technology Officer – YipTel, L.L.C.

Jeff has worked in Information Technology for over 15 years. Jeff began his career when he served as a certified Instructor teaching courseware and certifications from leaders in the industry including CompTIA, Microsoft, Cisco, and Novell. His natural talents and abilities have earned him the nick name "certified smart guy" and have made him valuable and sought-after in the industry. Jeff's experience and expertise brings answers and success to the many organizations he interacts with.

Jeff also served as Chief Engineer for Intellisys for over 10 years where he was able to leverage his networking skills with the emerging VoIP technologies to design and deliver innovative solutions to thousands of organizations throughout Utah and around the world. Working closely with clients like LANDesk, Deseret First Credit Union, Bank of Utah and many more to design and implement end to end network and carrier based services to our clients.

Now serving as CTO for YipTel Jeff is able to leverage his extreme knowledge of the client side of VoIP implementations with the Carrier side.

He provides his technical expertise via pre and post-sales consulting to hundreds of businesses every year, businesses that include medical facilities, law firms, banks, credit unions, call centers, retail stores, school districts, city offices, and others of all shapes and sizes.

Jeff has focused on and has developed a strong understanding of network, telecom, and Voice over IP solutions for businesses. He has personally designed, installed, or configured hundreds of solutions and systems over the years. Solutions involving such technologies and equipment as routers, switches, firewalls, frame relay, MPLS, ISDN, PPP, T1, PRI, TCP/IP, VPN, DSL, EOC, wireless, antivirus, backups, security, cabling, PC hardware, CAT5, fiber, AD, WTS, remote access, DNS, DHCP, e-mail, SQL, SIP, SNMP, phone systems, fax servers, VoIP, Asterisk, Windows, NetWare, Microsoft Office, and others from such manufacturers as 3Com, Aastra, Adtran, Bogen, Cisco, Comdial, D-Link, Dell, Digium, HP, Intel, Linksys, McAfee, Quintum, RAD, Secure Computing, SnapGear, SonicWall, Snom, Sun, Symantec, Unicom, Valcom, Vertical, Vodavi, and Zultys.

Kameron Olsen – VP Sales/Marketing

Kameron began his career as a business to business sales consultant in 2004 where he spent time selling industrial packaging supplies. It was here where he received training on customer service and technical sales through their intense sales training at American River Package One. During this time he also graduated with a Bachelor's degree in business management at Utah Valley University. He also focused on schooling in marketing, and sales management.

Kameron entered the telecommunication industry in 2006 where he was mentored and trained by some of the Industries top producers. During his first two years he have doubled his sales and has worked his way up the organization to becoming the top performer and now leads the sales efforts of YipTel and has also designed and implemented the YipTel Agent Chanel.

This was done by finding innovative solutions for customers which made sense financially and helped clients communicate more efficiently. For example, Standard Plumbing Supply look to us to find a solution to allow all 50+ offices across the western United States communicate as a single business and cut cost in the process. We took the time to analyze their business and follow their communications pattern. We looked at their current costs of communications services including the costs of T1's, analog lines, maintenance and equipment cost of out dated PBX's at different locations. We then came up with a plan that helped increase connectivity and communications and at the same time reduce costs. We provided provided MPLS T1's to each location and centralized SIP trunking at the corporate office. We reduced their total service bill by 25% which gave them an ROI on the phone system in about 6 months providing costs savings of hundreds of thousands of dollars over a three year contract period.

Due to the outstanding sales performance he was promoted to VP of Sales for YipTel in January of 2011. In the past two years we have had tremendous growth in a down economy by doubling our sales staff and putting a strong focus on efficient and effective sales procedures, releasing new products and innovating the way customers finance equipment. Our sales staff is well educated on the products we offer and industry/business communication needs which allows us to educate our prospects and customers and design a communications platform that fits each individual business's needs. We have spent hundreds of hours documenting and designing procedures to increase customer service, stream line service orders and reduce company overhead.
