ISSUED: January 25, 2013

SYNOPSIS

By this Report and Order, the Commission converts this matter to an informally adjudicated matter. Additionally, the Commission approves the application of YipTel, L.L.C. for a Certificate of Public Convenience and Necessity authorizing applicant to compete as a Competitive Local Exchange Carrier within Utah.

By The Commission:

PROCEDURAL HISTORY

YipTel, L.L.C. (“Applicant”) filed its application on January 2, 2013, seeking a certificate of public convenience and necessity (“Certificate”) for authority to compete as a telecommunications corporation providing facilities-based and resold local exchange, access, and interexchange telecommunications service throughout all of Utah. The application contains detailed information regarding the technical, financial, and managerial resources and abilities of Applicant to provide the public telecommunication services it seeks to offer.

On January 22, 2013, the Division of Public Utilities (“Division”) filed a memorandum recommending approval of the application. The Division has reviewed verified

financial statements showing Applicant to have a positive net worth and to have ample working capital. The Division believes Applicant's management team has adequate experience in the telecommunications industry. The Division reports Applicant seeks authority as a reseller of local exchange services in the service areas of CenturyLink. Applicant represents it intends to negotiate with CenturyLink for an interconnection agreement. Applicant, according to the Division, does not plan to construct any facilities in the state. Applicant represents it will provide access to local exchange, toll, operator services, directory assistance, directory listings, and emergency services such as 911 and E911 either through facilities-based interconnection or through resale services purchased directly from CenturyLink.

As noted in the Division's memorandum, Applicant asserts approval of its application will serve the public interest, enhance competition, and expand customer options. According to Applicant, it has never had any complaints for unauthorized switching (slamming) or any other illegal activities. Applicant states that while it does not have a written policy on slamming, Applicant will comply with all applicable laws. The Division recommends the Commission waive the requirement that Applicant file proof of a \$100,000 bond, because Applicant will not require customer deposits or prepayments of any kind.

The Division expects the application will be unopposed and uncontested; therefore, the Division recommends the Commission adjudicate this application informally per Utah Administrative Code R746-110-1.

In light of the foregoing, the Commission enters the following Findings of Fact, Conclusions of Law, and Order.

FINDINGS OF FACT

1. This matter can be reasonably expected to be unopposed and uncontested. There are no intervenors and no opposition to the application.
2. Applicant has filed sworn statements or other supporting documents containing the necessary information in support of the application.
3. Applicant has demonstrated it is qualified to do business in Utah.
4. Applicant requests the Commission grant the Certificate authorizing it to provide public telecommunications services within Utah.
5. Applicant initially proposes to provide public telecommunications service in Utah, within the CenturyLink service area, and that is the extent to which Applicant is granted authority through this order. If Applicant wants to provide public telecommunications service outside of the CenturyLink service area, Applicant must submit a new application demonstrating that granting Applicant additional service area is in the public interest.
6. Applicant will utilize its managerial expertise to support its Utah operations.
7. Applicant has sufficient technical resources and abilities to provide the public telecommunications services it desires to offer.
8. Applicant has a secure and sufficient source of funding for its Utah operations that will enable it to meet projected capital and operating expenses, and to implement its business plans.
9. In providing intrastate services, Applicant will be subject to competition from other certified telecommunications service providers.

10. Applicant's service offerings will provide customers with a wider range of choice in meeting their telecommunications needs and will support the development of competition.
11. Applicant will not require customer deposits or offer any prepaid services in Utah.
12. Applicant has applied for waiver of the \$100,000 bond.

CONCLUSIONS OF LAW

1. This matter should be adjudicated informally, without a hearing.
2. Applicant meets each of the statutory requirements of Utah Code Ann. §§ 54-8b-1.1 *et seq.* for the requested Certificate.
3. The requested exemption from the \$100,000 bond requirement is in accord with Commission practice, and is in the public interest.
4. Issuance of the requested Certificate to provide public telecommunications services, as described in the application, is in accord with the legislative policy set forth in Utah Code Ann. §§ 54-8b-1.1 *et seq.*, and is in the public interest.
5. Restricting the Applicant's Certificate to exclude those exchanges with less than 5,000 access lines that are served by incumbent telephone corporations with fewer than 30,000 access lines in the state is in the public interest.

ORDER
