SECTION 5 - NETWORK SERVICES

5.1 Service Offerings - General

5.1.1 Description

- A. The Company undertakes to provide Non-Residential Customers with the following types of network services:
  - Converged Voice Service – **GRANDFATHERED** (C)
  - FlexVoice<sup>SM</sup> Service
  - SIP Trunking Service – **GRANDFATHERED** (T)
- B. All services offered in this price list are subject to Nonrecurring and Monthly Recurring Charges.
- C. These services provide a Customer with the ability to connect its terminal equipment, inside wiring, or transmission facilities to the Company’s switched network for the origination and reception or telephonic communications, and includes optional features designed to facilitate the use or expand the functionality of communications services. Services may be provided by the use of the Company’s own facilities, by resale of services provided by other telephone companies, or by a combination of these methods.
- D. Service is intended for end user applications with local usage not to exceed 200,000 minutes per month. Terms and conditions, rates and charges for applications exceeding 200,000 minutes of local usage per month will be determined on an individual case basis. If the Customer’s actual usage exceeds 200,000 minutes of local usage per month, the Company may, upon 30 days written notice, re-calculate and adjust the monthly recurring rates to be charged to the Customer. If the Customer does not accept the adjusted rates, it may upon notice to the Company terminate the Service. Termination liability charges may apply as specified elsewhere in this price list.
- E. To the extent facilities are available, services offered under this price list are provided by the Company on an On-Net basis. Unless otherwise noted, prices for services offered under this price list reflect the On-Net price for such services. Where service is provided on an Off-Net basis, additional charges may apply. If during a contract period the Company brings a Customer’s service onto the Company network, pricing for the original configuration shall continue to apply for the duration of the contract period.

**LOCAL EXCHANGE SERVICES PRICE LIST**

---

**SECTION 5 - NETWORK SERVICES, (CONT'D.)****5.2 Converged Voice Service**

**Effective February 15, 2022, Converged Services are grandfathered to existing customers at existing locations.** (N)  
(N)

**5.2.1 General**

Level 3 Telecom Converged Voice Service is a flexible bandwidth bundled service consisting of local exchange service with selected features, a Long Distance and/or Toll Free usage allowance and the option of adding Internet Access and/or Virtual Private Network (VPN) service.

All Converged Voice services include a fully managed integrated access device placed at the Customer premises. Services can be provided via a TDM interface (T1 or DS3) or via an Ethernet interface in a wide range of bandwidth options as shown in the pricing tables below.

The integrated access device provided by the Company is furnished with a separate, mandatory battery back-up. Although the Company owns and maintains the integrated access device as part of its system equipment, the separate battery back-up is purchased by the Customer and becomes its property and responsibility, including maintenance and replacement. The battery back-up is not part of the system equipment as that term is defined and used in this tariff. The cost of the non-optional battery back-up is included in the quoted charge for service. The Company will not be responsible for the maintenance or repair of the battery back-up. The Customer acknowledges that in the event of a power failure, the failure of the battery back-up system will result in loss of service, including 911 service, and that the Company bears no responsibility for such loss of service. The manufacturer of the battery back-up offers a warranty, but the Customer must take affirmative action to activate this warranty or it will not be effective. It is the Customer's responsibility to activate this warranty by following the instructions provided in the service order.

The Customer receives a long distance allowance which may be used for 1+ and/or toll free services, based on the call package purchased. The following language is grandfathered as of December 3, 2012: (The Customer receives a long distance allowance which may be used for 1+ and/or toll free services, based on the total Converged bandwidth purchased as follows:

Up to and including 2 Mbps - 2,500 Minutes of Use  
More than 2 Mbps up to and including 4 Mbps - 5,000 Minutes of Use  
More than 4 Mbps - 7,500 Minutes of Use.)
