## PRICE LIST FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the price list. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4<sup>th</sup> Revised Page 14 cancels the 3<sup>rd</sup> Revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the price list page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).I.
  - 2.1.1.A.1.(a).I.(i).
  - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a price list filing is made with the Commission, an updated Check Sheet accompanies the price list filing. The Check Sheet lists the pages contained in the price list, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The price list user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

## **SECTION 4 - BASIC SERVICES AND RATES, (CONT'D.)**

### **4.3 Network Exchange Bundled Service, (Cont'd.)**

#### **4.3.1 General, (Cont'd.)**

Network Exchange Bundled Service may include the calling features listed below:

These features are offered subject to availability of suitable facilities. Certain features may not be available with all classes of services.

In the event the Company adds custom calling features to its Network Exchange Bundled Services, such features will be available upon the tariff effective date (where technically feasible) to all new Customers. Existing Customers will be informed of the new features availability but must contact the Company to obtain the new features. Any Service Order Charges, which would normally apply, will be waived.

Call Forwarding - Fixed, Busy Line No Answer - This feature, when activated, redirects attempted terminating calls to another Customer-specified line. Call originating ability is not affected by Call Forwarding - Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding - Fixed, Busy Line No Answer is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Caller ID with Name - Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE. In areas where Caller ID with Name is not available, Caller ID, which only displays the incoming telephone number, will be substituted.

Call Forwarding - Variable - a Customer activated feature that automatically transfers all incoming calls from the Customer's telephone number to another dialable telephone number until the Customer deactivates the feature. If forwarded to a long distance number the Subscriber will incur the long distance charges.

## SECTION 4 - BASIC SERVICES AND RATES, (CONT'D.)

### 4.3 Network Exchange Bundled Service, (Cont'd.)

#### 4.3.1 General, (Cont'd.)

Network Exchange Bundled Service may include the calling features listed below, (cont'd.):

**Call Trace** - Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company for action. The Customer originating the trace will not receive the traced telephone number. The results of the trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them.

**Call Blocking** - Call Blocking allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring. The screening list may be edited and revised at Customer's discretion.

**Distinctive Ring** - Distinctive Ring is a feature that allows a Customer to have up to two separate phone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on an incoming call to allow for identification of the number being called. A distinctive call waiting tone is also provided for each telephone number, where facilities permit and Customers subscribe to Call Waiting. Distinctive Ring is offered subject to availability of suitable facilities.

**VIP Alert** - Allows a customer to program telephone numbers of selected callers, enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone.

Network Exchange Bundled Service may include the calling features listed below, (cont'd.):

**Privacy Service** - A feature which intercepts calls that are marked "private" and "out of area," or "unavailable" on Caller ID units. When unidentified callers dial the Subscribers number, they will receive an announcement informing them that the party they are calling does not accept calls from unidentified callers. They will receive a prompt to identify their name or state their intention and the service will then attempt to connect the call. Only if the caller responds will the call be connected.

## SECTION 4 - BASIC SERVICES AND RATES, (CONT'D.)

### 4.3 Network Exchange Bundled Service, (Cont'd.)

#### 4.3.1 General, (Cont'd.)

The Subscriber's Caller ID will display the platform number and the name of the service. If the Subscriber chooses not to take the call the caller will hear a message which states the Subscriber is unavailable.

Privacy Service is offered subject to availability of suitable facilities. This service will be provisioned on a line-by-line basis and Customers with more than one line would need to have the service activated on each line if they want the ability to intercept unknown and blocked calls to each line.

**Call Waiting with Caller ID with Name** - Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller's name and number previewed on a display screen allowing a Customer to prioritize and or screen incoming calls. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. In areas where Caller ID with Name is not available, Caller ID, which only displays the callers telephone number, will be substituted.

**Speed Calling** - This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

**Three Way Calling** - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

##### E. Calling Features

These features are offered subject to availability of suitable facilities. TrinsicBusiness A La Carte may include the calling features listed below:

Call Forwarding - Fixed - Call Forwarding- Fixed, when activated, redirects attempted terminating calls to another Customer-specific line. The Customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedure. Call originating ability is not affected by Call Forwarding-Fixed. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding-Fixed is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Speed Calling - This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in an 8 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Caller ID - Allows a Customer to see a caller's telephone number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE.

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. Customers must actively choose this feature on a line-by-line basis. Call Waiting is not available on lines enabled for Rotary Hunting.

The feature may be used on both outgoing and incoming.

Hunting - Routes a call to an idle station line in a prearranged group when the called station line is busy. This feature is available at no charge but must be requested by the Customer.

Distinctive Ring: Distinctive Ringing is a feature that allows Customer to have up to two separate phone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on an incoming call to allow for identification of the number being called. This surcharge, which is in addition to standard price listed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

### 5.5 Optional Calling Features

The features in this section are made available to Residential and Business Customers on a per use basis. All features are provided subject to availability. Customers may utilize each feature by dialing the appropriate access code. The Customer will be billed the per feature activation charge shown in the table below each time a feature is used by the Customer. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all some uses in some cases.

#### 5.5.1 Feature Descriptions

**Return Call** - Allows a Customer to return the most recent incoming call and, after dialing a code, hear an announcement of the last telephone number that called. If the Customer wishes to return the call right away, voice prompts will instruct the Customer to dial a certain digit and the call will automatically be returned.

**Call Trace** - Allows a Customer to initiate an automatic trace of the last call received. After receiving the call which is to be traced, the Customer dials a code and the traced telephone number is automatically sent to the Company. The Customer using Call Trace is required to contact the Company for further action. The Customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted authorities upon proper request by them.

**Continuous Redial** - Permits the Customer to redial automatically the last number dialed.

**Three Way Calling** - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

**Call Blocking** - Call Blocking allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring. The screening list may be edited and revised at Customer's discretion. This feature may not be available with all Company services.

**Per Line Blocking** - When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. Customers who choose per line blocking for the first time will not be charged the nonrecurring charge. After the first time, customers requesting per line blocking will pay a nonrecurring charge for each line equipped with per line blocking. Per line blocking will be provided free to law enforcement and domestic violence agencies and individual victims of domestic violence upon request.

### 9.3 Custom Calling Features

All customer calling features are provided subject to availability. Certain custom calling features may not be available with all classes of service. Transmission levels for calls forwarded or calls placed or received using custom calling features may not be acceptable for all uses in some cases.

#### 9.3.1 Feature Descriptions

##### Anonymous Call Rejection

Anonymous Call Rejection allows the Customer to automatically reject all calls which have been indicated as anonymous, unavailable or private by the calling party. When Anonymous Call Rejection is active, the called party receives no alerting for a call that has been rejected. The call is routed to a denial announcement and subsequently terminated.

Customers who are subscribed to Anonymous Call Rejection activate the service by dialing \*77 and can deactivate the service by dialing \*87.

##### Auto Busy Redial – Repeat Dialing

Auto Busy Redial – Repeat Dialing allows the Customer to have calls automatically re-dialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the Customer with a distinctive ringing pattern when the busy number and the Customer's line are free. The Customer can continue to make and receive calls while the feature is activated. The following types of calls cannot be reached using Auto Busy Redial – Repeat Dialing:

- Calls to 800 Service numbers
- Calls to 900 Service numbers

### 9.3 Custom Calling Features (Cont'd.)

#### 9.3.1 Feature Descriptions (Cont'd.)

##### Call Blocking

Call Blocking allows the Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring. The screening list may be edited and revised at Customer's discretion. This feature may not be available with all Impact services.

Customers who are subscribed to Call Blocking activate the service by dialing \*60 and can deactivate the service by dialing \*80.

##### Call Forwarding

Call Forwarding allows the Customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which all incoming calls are to be transferred automatically. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between the customer's access line and the distant access line to which the call was transferred.

Customers who are subscribed to Call Forwarding activate the service by dialing \*72 and can deactivate the service by dialing \*73.

##### Call Return

Call Return allows the Customer to return a call to the last incoming call whether answered or not. Upon activation, it will re-dial the number automatically and continue to check the number every 45 seconds for up to 30 minutes if the number is busy. The Customer is alerted with a distinctive ringing pattern when the busy number is free. When the Customer answers the ring, the call is then completed. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

Customers who are subscribed to Call Return activate the service by dialing \*69 and can deactivate the service by dialing \*89.

##### Call Trace

Call Trace allows the Customer to initiate a trace of the last completed incoming call by dialing an activation code before receiving another call. Call Waiting provides a tone signal that alerts the Customer talking on the line when a second call is incoming. A maximum of two calls may be in process at one time. ##### Call Waiting ID - Name and Number

Call Waiting ID - Name and Number is an enhanced version of Call Waiting ID. It is designed for use by a Call Waiting subscriber. The standard ringing pattern applies to the billing telephone number, while the dependent telephone number receives a distinctive ringing pattern for incoming calls. ### 9.6 Directory Listing Services

The following rates and regulations apply to standard listings in light face type in the white pages (alphabetical section) of the telephone directory and to the Directory Assistance records of the company.

Directory listings are limited to such information as is essential to the identification of the listed party. The listing of a service, commodity, or trade name is not permitted unless it is the name, or an integral part of the name, under which the Customer does business.

A listing is limited to one line in the directory, except where in the judgment of the Company, more than one line is required to identify the Customer properly. In such cases, the additional lines required are provided at no extra charge.

Listing services are available with all classes of main telephone exchange service.

#### 9.6.1 Listings

One listing, termed the primary listing is included with each Customer's service.

At a charge, additional listings may be included in the alphabetical directory and on directory assistance records, or appear on directory assistance records only. The additional directory listing charge commences with the delivery date of the issue of the directory in which the listing first appears. The monthly rate for an additional listing commences the day after the directory assistance records are posted.

If an additional listing is ordered discontinued by the Customer after the closing of the directory, the monthly rate continues through that issue of the directory and up to the date for rates to be effective for the next directory. If the additional listing is ordered discontinued before the closing date of the directory in which it would first appear the monthly rate continues only to the date of cancellation by the Customer, with a minimum service period of one month.

### 9.6 Directory Listing Services (Cont'd.)

#### 9.6.3 Non-Published Service

The telephone numbers of non-published service are not listed in either the Company's alphabetical directory or Directory Assistance records available to the general public. The telephone numbers of non-published service or the name and billing address that corresponds to a non-published number may be divulged in the following two instances:

First, in the interest of public safety, where a government agency subscribes to Enhanced Universal Emergency Telephone Number Service (E911) the telephone number and address, but not the name, of a customer with non-published service will be displayed when that customer dials 911 to a government employee at a console at a Public Safety Answering Point for dispatch of emergency service.

Second, the billing name and address that correspond to a non-published telephone number will be furnished to a subscriber to Billing Name and Address (BNA) Service if the customer with the non-published service makes a call that uses the service of the BNA subscriber.

Incoming calls to non-published service will be completed by the Company only when the calling party places the call by number. The Company will adhere to this practice not withstanding any claim the calling party may present, except claims of emergencies involving life and death. In such cases, the Company will call the non-published number and request permission to make an immediate connection to the calling party.

If, in error, the telephone number is published in the directory, the Company's only obligation is to credit or refund any monthly charges the Customer paid for non-published service.

The Subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a non-published service or the disclosing of said number to any person.

### 9.6 Directory Listing Services (Cont'd.)

#### 9.6.4 Non-Listed Service

Non-listed service means that the Customer's telephone number is not listed in the directory, but does it appear in the Company's Directory Assistance Records.

This service is subject to the rules and regulations for E911 service, where applicable.

The Company will only complete calls to a non-listed number, if requested by a caller, during the course of a directory assistance call completion service.

When the Company agrees to keep a number unlisted, it does so without any obligation. Except for cases of gross negligence or willful misconduct, the Company is not liable for any damages that might arise from publishing a non-listed number in the directory or disclosing it to some. If, in error, the telephone number is listed in the directory, the Company's only obligation is to credit or refund any monthly charges the Customer paid for non-listed service.

The subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a non-listed service or the disclosing of said number to any person.

There is a monthly charge for each non-listed service. This charges applies if the Customer has other listed service at the same location; if the Customer lives in a hotel, boarding house or club with listed service; or if the service is installed for a temporary period.

### 9.7 Public Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone used to access Company provided services. This surcharge, which is in addition to standard price listed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the “#” symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.
