ISSUED: April 3, 2008

SYNOPSIS

By this Report and Order, the Public Service Commission of Utah (the “Commission”) grants the request of Baldwin County Internet/DSSI Service, LLC (“Applicant”) for a Certificate of Public Convenience and Necessity (“Certificate”) authorizing Applicant to provide public telecommunications services within the State of Utah, excluding those local exchanges having fewer than 5,000 access lines of an incumbent telephone corporation with fewer than 30,000 access lines in the state. The Commission, having considered the record in this proceeding and the applicable law, hereby makes, adopts, and enters the following Report and Order.

By the Commission:

PROCEDURAL HISTORY

On February 7, 2008, Baldwin County Internet/DSSI Service, LLC (“Applicant”) filed its Application seeking Commission authorization to provide facilities-based and resold local, intraexchange, and interexchange telecommunications service throughout the state, excluding those exchanges with less than 5,000 access lines that are served by incumbent telephone corporations with fewer than 30,000 access lines in the state .

On March 11, 2008, the Division of Public Utilities (“Division”) filed a memorandum recommending approval of the Application. According to the Division, Applicant does not propose to provide basic local exchange service to either residential or business

customers, but will instead function as an intermediate carrier providing transport services to retail service providers. The Division's analysis indicates Applicant has considerable managerial and technical experience in the telecommunications industry. The Division notes Applicant's negative net worth but recommends waiver of the positive net worth requirement of Commission Rule 746-349-3 because, since Applicant has no plans to provide basic local exchange service to end user customers, Applicant's current financial status brings no risk to customers. Furthermore, the transport services to be provided by Applicant are not unique such that if Applicant were to withdraw service the downstream service provider would have little difficulty in replacing Applicant's services with those from another carrier. Finally, the Division notes that although Applicant is in the process of acquiring the \$100,000 bond required by Commission Rule and will provide proof of bond prior to offering any services in Utah, Applicant will not require customer deposits or prepayments of any kind.

Incumbent Local Exchange Carriers have been notified of the Application and have not requested intervention. Since no meritorious opposition has been raised, and Applicant has made out its *prima facie* case in support of the Application, there appears no reason to convene an evidentiary hearing on the matter. Accordingly, the Commission, having been fully advised in the premises, enters the following Report, containing Findings of Fact, Conclusions of Law, and the Order based thereon.
