**DATE: May 27, 2009**

**SUBJECT: Request for addition to tariff.**

**RE: Rate Case 0901-01**

It has been brought to my attention that an item of concern has not been addressed in the new rate increase/tariff.

Currently there is nothing in the tariff that addresses the need to charge for supplementary water use.

It is in the rules and regulations that "All water delivered by the company to its customers shall be metered through approved water meters. This includes fire hydrants and service connections."

The Division of Drinking water also requires that we inventory all water usage.

The cost of a fire hydrant meter assembly is \$1,000.00. The impact that a supplementary connection could have to the system can be quite extensive. Set up of the meter, adjustments to the water flows and follow up on questions or needs and monitoring of the system.

I would appreciate this consideration.

I would like to add to the tariff the following items:

Supplementary water would be defined as: Metered water from a fire hydrant or other temporary meter.

There is a \$100.00 fee to set up and take down for the meter. A \$1,000.00 deposit will be required to ensure against theft or misuse of the meter. Water used is to be charged at the rate of \$5.00 per thousand gallons.

Please contact me with any questions. 801 391-1105 cell phone

Thank you,

Rodger Smith, President
