Reference: Docket #09-21-79-01

Subject: One-time Assessment & Monthly Increase (46%) of water bill.

What data is there demonstrating a need to levy a one-time assessment and a monthly increase of 46% to property owners in Pine Valley? Since current rates are already as high as the top rates in Washington County, what prompts such an increase? Small increases over time can certainly be expected, but not such an outlandish one at once.

Please provide appropriate data substantiating the proposed plan. Is there a shortage of water in Pine Valley?

Respectfully,

Joseph and Carol Palmintiero
