Subject: Standby Fees for Lot 43 and 51 HI-Country Water for past 20 years , judgements, lens bench warrents From Hi-Country Water Co a utility or a stock mutual water company Formal Complaint Gary Widerburg and all commissioners of the commission

Dear Mr. Widerburg and all members of the Public Service Commission of Utah

I am requesting that the commission make a full review of the charges for standby fees, late charges, interest attorney fees and all other charges that Hi-Country Water has levied against the two lots referenced above and used judgments and bench warrants to collect from Rod Dansie and other listed owners of the two lots. I do not have any of the files or documents for the charges since none were provided to me. The Water company Utility Hi-Country Water will have of the documents. Please initiate a full review of the charges and fees going back 20 years plus and collected under the By-laws, protective covenants and rules of the Stock mutual company Hi-Country water operated by the HI-Country HOA. I need your review since it does not appear that collection process is in the current tariff of Hi-Country water co. Please provide me with a full copy of your finings and investigation of the above referenced matter. Please me at [801 254-4364](tel:801-254-4364) with any questions that I can answer. The Water Utility has all of the files and documents that you will want for your investigation and review of the charges and process regarding the standby fees. The Judgment that I was required to pay was over \$65,000 or go to Jail. I really need you help and cooperation regarding this matter. Something is wrong and I would appreciated your help as the Public Service Commission to get answers as to what is going on with the HI-Country Water a Public Utility. thanks
Rodney Dansie [801-254-4364](tel:801-254-4364)
