

June 24, 2013

Cedar Ridge Dist. Co. Customers,

This is a notice that the water company has filed with the Public Service Commission for an increase in water rates (see attached letter).

The water company has known about the water increase from Tremonton City for over a year and has been paying Tremonton City .50 cents per thousand gallons as of July 1, 2012. However, the water company has waited to see how this would affect the financial well being of the company. The company feels that an increase in water rates for the water use over 12,000 gallons per month from .35 cents to .50 cents per 1,000 gallons and any portion thereof will provide sufficient revenue to operate in the black without have to change the base rate of \$57.00 per month.

We have requested that this new rate be effective July 1, 2013.

David Z. Thompson
President,
Cedar Ridge Dist. Co.
