

Any Anticipated Additions or Improvements –

Community Water has hired Bowen & Collins to do a completed evaluation and asset management plan. This evaluation will provide water rights evaluation, supply and demand evaluation and infrastructure improvements/replacement information. After initial field observations, we have compiled a list of items that will require immediate action and others that need attention in the next 1 to 5 years. There are a number of anticipated additions or improvements as shown on the Community Water Additions & Improvements (Attached).
