This email is to explain the email sent on March 15, 2018.

The reason for last week's email was WatePro was asked by Paul Hicken to forward an updated Tariff indicating our current rates.

Included in that email and this current email is an updated Tariff reflecting changes to **only** page 4 which is in conjunction with our Settlement Stipulation signed on June 20, 2017.

I have also included the reflected changes to page 4. As you can see, the updated Tariff reflects the new culinary water rates approved through the Settlement Stipulation. The pdf file has both the old rates and the new. I am hopeful this information will be helpful to see the changes made to the tariff.

Should you have any concerns or questions please be in contact.

Thank you,

Darrin
