SUBJECT: Utah Docket No. 16-2443-01, WaterPro Tariff Revision

Dear Mr. Widerburg,

We are pleased to submit this letter to the Public Service Commission (PSC) applying for a tariff revision for Culinary Water connection fees. WaterPro previously submitted an application for a water rate increase that was approved August 8, 2017. The approved changes were for the rate increases on page 4 of the February 2015 tariff and did not include revisions for connection fees or other fees. WaterPro inadvertently submitted an updated tariff to the PSC on March 15, 2018 with updated approved water rates that also included unapproved changes to connection fees. Subsequent communication from the PSC dated June 22, 2018 identified changes in the updated tariff on pages 3 and 6 that were not in compliance with the PSC's order of August 8, 2017. The PSC letter recommended that the fees on these pages revert back to the amounts approved effective February 2015, and required WaterPro to submit a request and application to the PSC for tariff revisions.

The purpose of this request is receive approval to replace the currently approved connection fee page 3 in the tariff schedule with the attached proposed connection fee schedule. Page 6 of the tariff will remain as approved in 2015. Both the existing updated tariff (2015 tariff with approved 2017 water rates) and proposed tariff (2015 tariff with approved 2017 water rates and revised water connection) are attached for comparison. The only proposed revisions to the tariff are on Page 3 for connection fees. Additional explanation for the connection fee increases is also included with this request.

We respectfully request your assistance in the processing of the application. If you need additional information please contact me at WaterPro at 801-571-2232, or you may contact our engineer Jon Oldham at 801-495-2224 who assisted in the generation of backup material.

Sincerely,

Darrin L. Jensen-Peterson
C.E.O / General Manager
