In regards to the above referenced docket, I am owner of a manufactured home located in the park. I have paid a water bill for the past several years and constantly being harassed by the Park owner Renn McBride. I have been in contact with the AG office and they have advised me to contact your division, in regards to paying for water from an illegal service. It appears it is almost into compliance, at this time however after further research and his request I am extremely concerned the potential effect this may have on the owners of manufactured homes within the park with no oversight.

In regards to question 2
is the company serving its members only and not to the public generally... Do you have a definition of this, I feel it is to the public as I am not a member of his organization, and membership should not be associated with lease of spaces, which there is no lease in place.

I will be providing further information at a later time, what is the process to request the charges for water for the last 2-3 years refund to the 71 trailers that have been paying for this illegal service

I know my water bill currently is about double of what Ashley Valley charges the McBride for services
