Re. Water system

Dear WA20 Members,

As a Board we have been working with the Utah Division of Drinking Water (DDW), beginning the process of getting our water system compliant with the current rules and regulations. The DDW has determined that we are a "Public Drinking Water System". Public water systems are also subject to the rules and regulation of the Public Service Commission.

The purpose of this letter is to notify you that we are applying for an exemption from regulation by the Public Service Commission of Utah. We are seeking this exemption because WA20 supplies water only to its members and not the public generally, we believe an exemption will be granted.

As we continue moving forward we will keep you informed of our efforts to replace our aging water tank. This is a very large undertaking, but we have some qualified individuals within our membership who are actively addressing these issues.

If you have any question or concern please feel free to contact me.

Sincerely,

Brad J. Rawson
WA20 President
