Attn: Fred Nass

Utah Public Service Commission.

High Country Estates 1 Water Company in Herriman, Utah is planning to request a rate review. This is necessitated by the requirements of a proposed loan we are seeking from the Utah Division of Drinking Water to perform required repairs to our water system. (Application Response Attached.) In addition, our engineering company is performing a rate analysis to ensure future rates are adequate not only to repay our loan, but sufficient to cover operating costs and capital reserve requirements.

We look forward to working with you and the commission to provide all needed documentation and requirements needed to successfully have our requested water rates reviewed and approved.

Regards,

Paul W Dahle, VP
